

Fast Fix™

Contains TAZO®

Divot Repair Mix

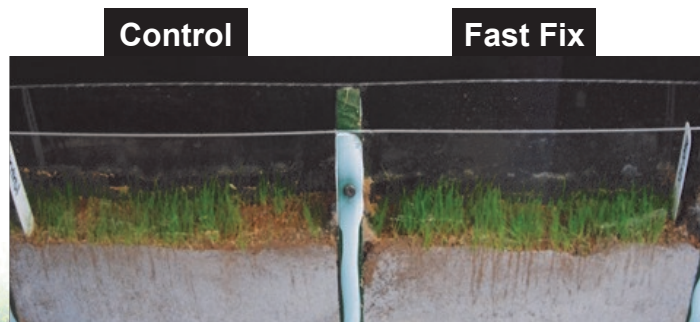

Benefits:

- Faster germination
- Keeps moisture by roots
- Better stand
- Fixes Nitrogen
- Simulates rooting
- Increases growth

Turf Seed Inoculant Formulated for repairing divots

FAST FIX™ is a unique blend of ingredients that when used as a seed treatment for use in treatment of divots improves the survival of the germinating seed.

The water holding capacity of FAST FIX along with the TAZO® helps keep the new roots moist and growing as the germination and emergence is occurring.

Fast Fix™

Directions for Application:

Apply at a rate of 1 pound per cwt. Mix dry product with seed to be treated. Stir in until seeds are coated. Avoid breathing dust. Mix treated seed with sand. Not suitable for use with mechanical planters.

Storage

Store in a cool dry place. Avoid freezing temperatures. Use before expiration date. Open package only when ready to use.

Application Rate

Use rate: 1 pound / cwt of seed
Available in: 1# and 5# containers
